

Take a load off your back

Reduce staff injury risks, improve patient comfort

- **Compact and portable for easy storage with patient**

- **Strong and durable, holds up to 1,000 lbs.**

- **Non-woven, fluid-resistant construction**

Safely transfer patients in any setting

Compact and portable, the single-patient-use **MegaMover Transport Unit** is ideal for transferring or transporting patients from just about anywhere, reducing strain on your back and shoulders while safely and comfortably moving patients.

Non-woven, latex-free, fluid-resistant construction is strong and durable, holding up to 1,000 lbs. and standing up to the most demanding conditions. Accommodates any size patient, folds easily for storage, and weighs only 1 lb. Includes 14 ergonomic handles (6 per side and one on each end) for easier, safer lifting.

Available in two models. **MegaMover 1500** is White. **MegaMover Plus** is Grey and includes pockets to accommodate standard backboards for added patient support.
